

# ANCESTRAL AFRO HOUSE ESSENTIALS, Vol. 1

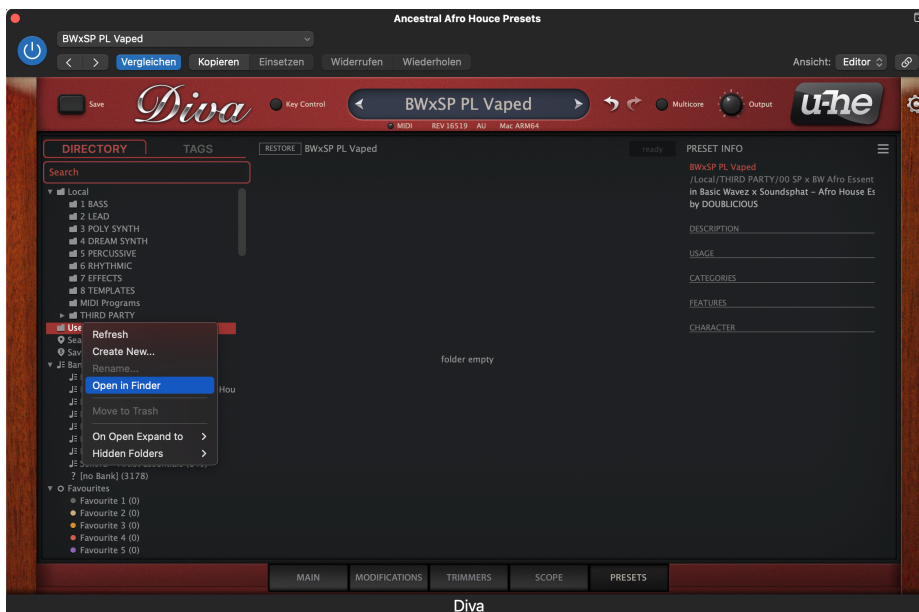

How to install your DIVA-Presets:

Before installing the Diva Preset Pack, make sure to download and un-zip it. Remember the location of the downloaded folder. It's most likely going to be in your "Downloads" folder. Now you want to open your DAW and follow the steps below:

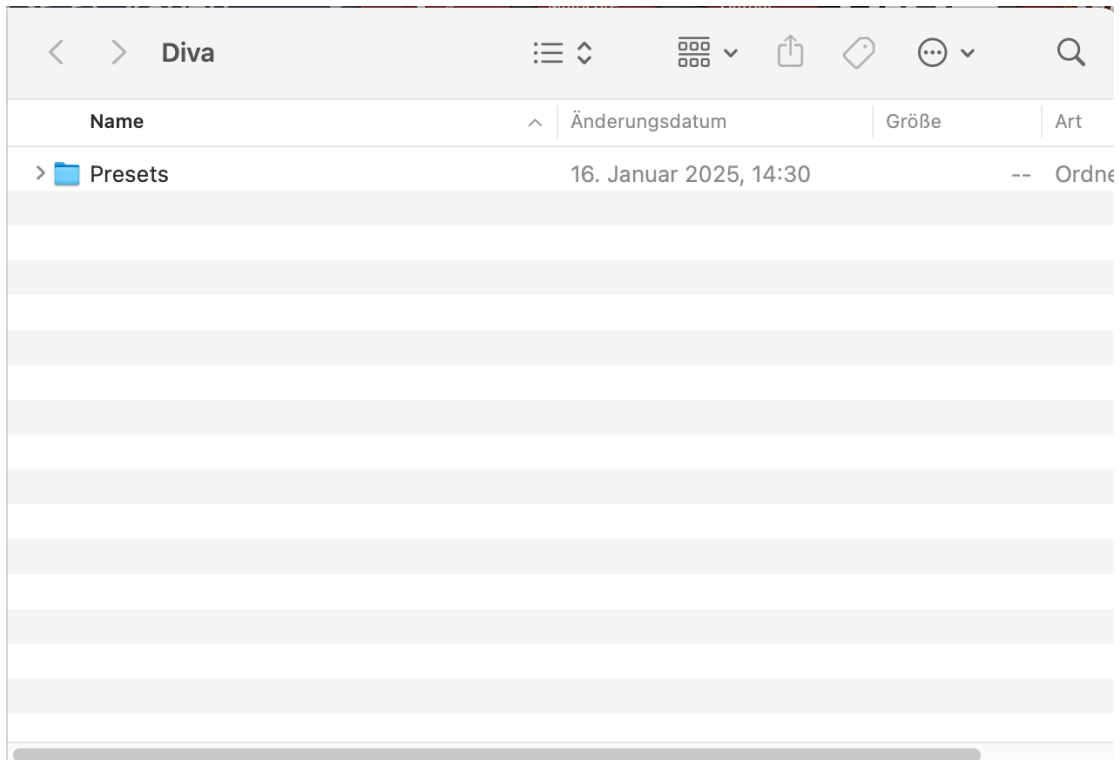

## 1. Open Diva

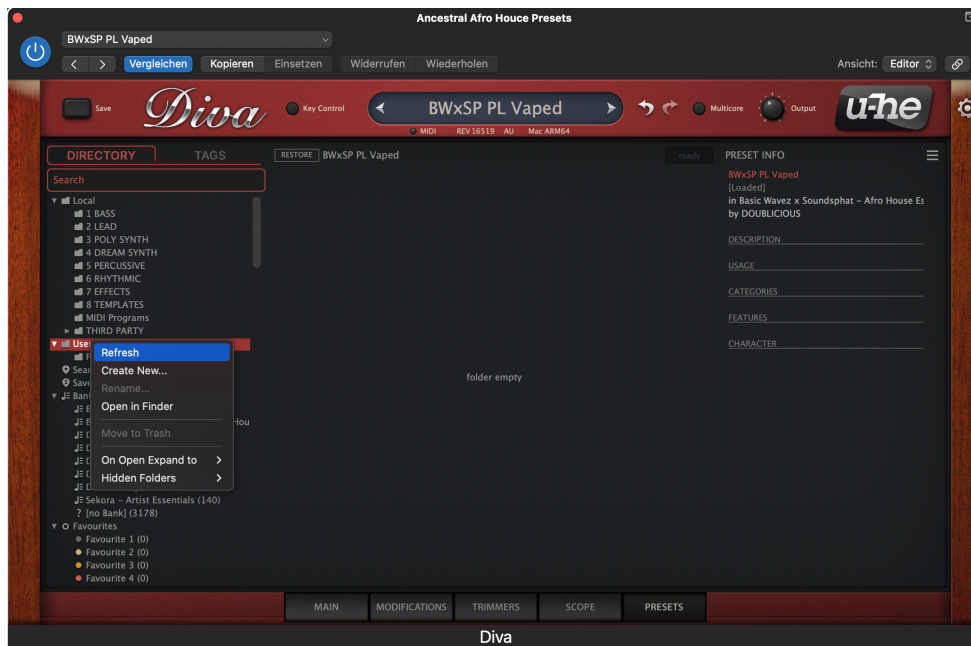

## 3. "Right click" on USER and select "Open in Finder"

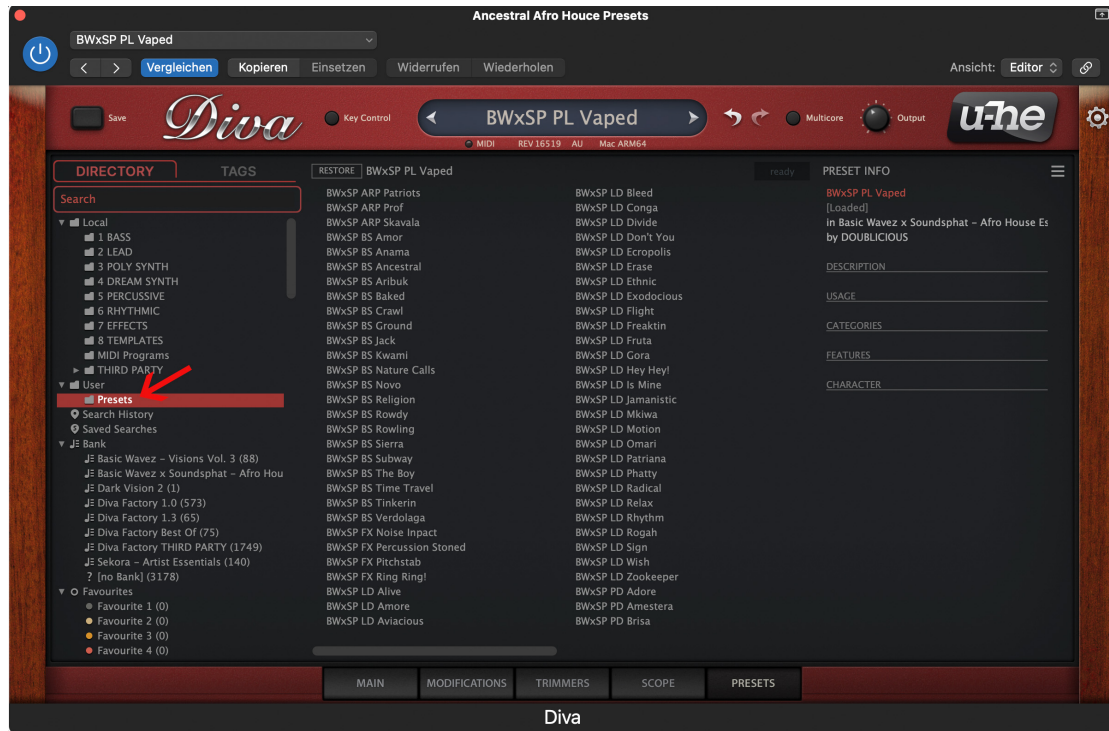

4. Drag and drop the new “Presets Folder” you just downloaded (in this case “Presets”) into the “Diva User Folder”

5. Open a new instance of Diva  
6. Head to the “Presets”-Section again  
7. “Right click” on USER and select “Refresh”

8. The new “Presets Folder” (in this case “Presets”) will appear. Select it and you will see all the single presets in the middle section of the screen.

We hope you are feeling inspired to create beautiful and timeless music with your new presets.
